ABOUT UTILITY SUPPLY GROUP

Why choose Utility Supply Group?

- Utility Supply Group is the leading national supplier of electrical products and components for RV Resorts, Campgrounds and Manufactured Home Communities, Park Management Companies and Contractors.
- We have over sixty years of electrical experience on staff and pride ourselves on providing you with exceptional service, high quality products at competitive prices.
- Our unique electrical layout service is another popular part of our added-value service. See page 3
- Our exclusive  brand of pedestals & power outlets have an extended 2 year warranty and are stocked in two regional warehouses for immediate shipment.
- We are open Monday thru Friday 8:30 am to 5 pm coast to coast
- We are also strategic partners with:
 - MIDWEST ELECTRICAL PRODUCTS
 - MILBANK MANUFACTURING
 - EATON
- We carry other products such as metering, lighting, water hydrants, wire, panel boards, transformers, utility metering, circuit breakers and replacement parts.
- If you don't find what you are looking for in this catalog, please give us a call. We will be happy to try to find it for you.
- Thank you for choosing Utility Supply Group!

"When choosing a supplier, Utility Supply Group has the people and products you can count on!"

Wade Elliott, USG President, serves on boards (NEC & NFPA) that establish electrical code standards as well as the Underwriters Laboratory (UL) Standards Technical Panel. As a result, the depth of our company knowledge with NEC & UL requirements is unmatched within our industry. This allows us to provide exceptional service and comprehensive solutions to our customers. By staying directly involved with these standards, USG has helped save the industry millions of dollars by heading off potentially costly and unnecessary code changes.

ELECTRICAL LAYOUT SERVICE

Utility Supply Group offers park and community operators our electric layout service. Whether you're developing a new park, expanding or upgrading your existing park, Utility Supply Group can provide you comprehensive, practical electrical layout package. Utilizing site plans you provide, we will: 1) Calculate voltage drop and load calculations pursuant to current NEC guidelines, 2) Provide materials list which includes a detailed cost quote and, 3) a recommended layout, and 4) material drawings & specifications.

Information we need from you:

- **Site plan showing the number of sites, along with scale and dimension details**
- **Maximum amp delivery per site (we suggest 50 amps at all RV sites)**
- **Additional load requirements for restrooms, laundry facilities, offices, etc.**
- **Locations of incoming utility power**
- **Limitations potentially impeding trenching, including trees, buildings or utility lines**
- **Identity of electrical utility providing power.**

Additional information requested may include whether you will meter individual sites, the dates on which materials will be required and whether materials will be purchased in phases.

We have provided hundreds of electrical layouts nationwide. Large or small we can provide you with an economical and feasible solution to help expand your business.

At Utility Supply Group we strive to bring new and innovative products to you. The two new Heritage pedestals below were developed with improved product features and quality to save you time and money. The **G-Series** incorporates the use of a GFCI circuit breaker in lieu of often problematic GFCI receptacles. GFCI self-testing circuit breakers are much more durable and protect the circuitry from dirt, moisture & insects. Helps eliminate costly receptacle replacements. **See page 5** for ordering details. The **R-Series** is a ring-less type version of our popular ring type metered products. The ring-less meter cover provides installation ease and added safety. No more fighting or replacing meter rings. Both are available as direct burial or pad mount with a 50/30/20 configuration only. **See page 5** for ordering details. The **Pad-Mount** is an economical and time saving solution to costly field wiring tasks. We now stock 30 & 50 amp circuit site testers. These devices can help you detect reverse polarity, open grounds & neutrals and elevated or low voltage. We also carry Fault Detector and wire location instruments. Contact USG sales office for ordering details or visit us online at www.go-usg.com.

G-SERIES

- 20A GFCI Circuit Breaker
- Pedestal or Surface mount
- Metered or Unmetered
- Ring Type Meter Socket
- Direct burial or Pad Mount
- 50/30/20GB Configuration
- LED light available
- **Available from USG Stock**

R-SERIES

- Ring-less Type Meter Socket
- Pedestal or Surface mount
- Metered or Unmetered
- Direct burial or Pad Mount
- 50/30/20 Configuration
- 20A GFCI Circuit Breaker option
- LED Light available

GROUND FAULT LOCATOR

- Locates Hidden Damage to Buried Cables (cuts & nicks)
- Dual Sensitivity for Locating High and Low Volt Damage

UNDERGROUND CABLE LOCATOR

Finds Many Types of Cabling, Including:

- CATV
- Electrical
- Telephone
- Lighting
